# Agile, Digital, Continuous, Integration...

## Benefits

- Forecasting and Reporting
- High Security
- Productivity
- Mobility and Flexibility

## Features

- Integration.
- Automation.
- Data Analysis.
- Reporting.
- Customer Relationship Management

# The Cool Office 3SD ERP

➤ Enterprise resource planning (ERP) is business process management software that allows an organization to use a system of integrated applications to manage the business and automate many back office functions related to technology, services and human resources.

➤ ERP software typically integrates all facets of an operation—including product planning, development, manufacturing, sales and marketing—in a single database, application and user interface.

## INTRODUCTION

Agency Banking is the system which allows commercial outlets like shops and supermarkets to act in some capacity on behalf of formal banks and financial institutes.

### 1.To Customers

Lower transaction cost (closer to client's home; client would visit store anyway for groceries, etc.),  
Longer opening hours and shorter lines than in branches,  
More accessible for illiterates and the very poor who might feel intimidated in branches.

### 2.To Agents

Increased sales from additional foot-traffic,  
Differentiation from other businesses,  
Reputation from affiliation with well-known financial institution,  
Additional revenue from commissions and incentives.

### 3. To Financial Institutes

Increased customer base and market share,  
Increased coverage with low-cost solution in areas with potentially less number and volume of transactions,  
Increased revenue from additional investment, interest, and fee income,  
Improved indirect branch productivity by reducing congestion.

## Benefits

- Making three devices in Cloud Platform
- Making one application Cloud
- Making one rule in Cloud
- Preparing & Programming

## Features

- Making three devices in Cloud Platform
- Making one application Cloud
- Making one rule in Cloud
- Preparing & Programming

# Parking Management System

- Smart Parking System is an integrated system to organize vehicles in public areas.
- All vehicles enter in to the parking and waste time for searching for parking slots.

## Benefits

- An easy to use dispatch board screen that offers quick access to available loads
- Quick access to views of available drivers and equipment
- Customer specific rating

## Features

- Easy to track vehicles
- Easy online booking
- Zero maintenance
- Reduced costs

# TRA-MS –Transport Management System

➤ Transport management system got easy with our web application. Right from the fleet management & control to online booking system, all the process has become easier with our product.

## Benefits

- Increase capacity.
- Improve performance.
- Focus on your core business
- Increased customer satisfaction

## Features

- Inbound & outbound transportation management
- Warehouse & fleet management
- Inventory control
- Supply & demand planning
